

marrette® black

wire connectors
#22 - #8

Do more with less...

...use **4** connectors instead of **6!**

NEW !

In fact, only four Marrette® wire connectors now cover the most complete range of wire combinations for high temperature applications.

Thomas & Betts is eliminating connectors nos. 29 and 37 which supported minimum and maximum wire combinations of the range and replaces them with two new and improved products.

The new Marrette wire connector model no. 30 will now be covering minimum combinations #22 to maximum #14. And as for the new Marrette model no. 35, it will support a minimum gauge of #18 to maximum #8.

In addition, these new Marrette® wire connectors for high temperature applications offer you a new design which provides a truer grip and, consequently, improved torque, to ensure a safe electrical connection meeting all North American standards institutes.

30 #22-#14
new Min.: 1 #22 + 1 #20
Max.: 3 #16
150°C (300°F)

33 #18-#12
Min.: 1 #18 + 1 #14
Max.: 4 #14
150°C (300°F)

31 #18-#14
Min.: 2 #18
Max.: 4 #16
150°C (300°F)

35 #18-#8
new Min.: 2 #14
Max.: 4 #10
150°C (300°F)
