BEL, the trusted partner of electrical professionals in Canada for over 60 years.

Founded in Montreal in 1964, BEL traces its roots to the Bélanger family workshop and quickly built a reputation for superior product quality and outstanding customer service. From that DNA emerged a complete range of electrical enclosures, renowned for their quality, durability, and performance.

Backed by deep expertise in custom design, BEL solutions meet the needs of the commercial and industrial sectors as well as OEMs. Using premium-grade materials and advanced manufacturing processes, they provide reliable protection against the elements, contaminants, and demanding operating conditions.

Now part of ABB Installation Products in Canada, BEL strengthens an already extensive portfolio of equipment designed to protect and connect electrical systems, from everyday environments to the most demanding applications.

Whether standard models or custom designs, BEL integration into ABB Canada ensures a dependable partner, improved market availability, a single purchasing journey for simplified ordering and invoicing, and prompt turnaround on quote requests.

True to the spirit of the Bélanger family and now within the larger ABB family, we remain close to people and their projects.

Commercial

In the commercial sector, our enclosures simplify installation, maintenance, and everyday use of your equipment.

Designed for real-world conditions, our solutions come in various sizes and configurations to adapt to architectural layouts and access constraints.

Essentials for your installations

- General-purpose enclosures
- Enclosures for telephone equipment
- Wireways
- Wireways, distribution boxes, and terminal blocks
- Meter cabinets
- Condominium enclosures
- Bus gutter systems
- Ventilated enclosures
- Cable-routing wireways

Application examples

- Communication enclosures for cable/antenna/satellite distribution, security systems, telephone and network wiring, and low-voltage systems in condominiums and other buildings.
- Indoor meter cabinets, including versions designed for underground cable pulling.
- “Telephone” cabinets (TCS/TCF) used in hospitals, schools, and hotels to group switches/dimmers, hide bulky components, or serve as junction boxes.
- Cable-routing wireways (indoor cable runs) and pathway accessories.
- Junction/pulling enclosures (indoor/outdoor depending on type) for connections and branching.
- Distribution boxes and bus gutter systems for indoor power distribution (up to several hundred amps depending on the series).
- Ventilated enclosures when airflow is required for the contents.
- Type 3R (weatherproof) enclosures for indoor or outdoor junction/pulling applications.

EUKO Series

NEMA 1 - Hinged Cover Cutout Boxes

Type 1 surface mounted box generally used as a junction, pull, switch or general service box. Hinged cover may be changed to a screw cover.

Technical specifications:

- 16 gauge steel
- Pre-punched holes to accommodate screw-hinged cover
- Easily removable knockouts on all sides
- Mounting holes on back
- Two grounding emboss & grounding screw
- ANSI/ASA61 grey polyester textured powder coating inside out

Note : This product is a universal enclosure. It can be used with either a hinged or a screw-on cover.

NEMA 1 - Hinged Cover Cutout Boxes

Diagrams

DUKO/DKO & D Series

NEMA 1 - Screw Cover Boxes

Note : This product is a universal enclosure. It can be used with either a hinged or a screw-on cover.

Type 1 surface or flush mounted (on request) enclosure generally used as a junction, pull box, switch box or general service box. Screw-on cover may be switched for a hinged cover (standard on EUKO model).

Technical specifications:

- 16 gauge steel
- Pre-punched side holes to accommodate screw-hinged cover
- With knockouts (DUKO/DKO) or without (D)
- Mounting holes on back
- Two grounding emboss on sizes up to and including 24246; pre-punched grounding holes on larger sizes
- Grounding screw provided with each model
- ANSI/ASA61 grey polyester textured powder coating inside out
- Specify "F" for flush mounting (i.e. DFUKO663)

NEMA 1 - Hinged Door Boxes

Type 1 surface mounted enclosure generally used as a junction or pull box, switch box or general service box.

Technical specifications:

- 16 or 14 gauge steel
- With easily removable knockouts (CKO) or without (C)
- Mounting holes on back
- Steel butt hinges
- Retractable sealing hasp
- Grounding emboss on 12126; grounding hole on larger sizes
grounding screw provided with each size
- ANSI/ASA61 grey polyester textured powder coating inside out

SBT & SBB Series

Splitter Blocks

These blocks are used in our standard splitters. They can be used for tapping branch circuits off feeders. All blocks are rated 600 V.

- Technical specifications:
- Cu-Al monopiece connectors secured to noryl insulators
 - Some connectors used in the standard splitter boxes are secured to an aluminum plate (Cu-Al)
 - Each block includes a main lug and branch lugs
 - Can be installed in splitter troughs & boxes

BG Series

NEMA 1 - Bus Gutters

Type 1 enclosure designed for indoor distribution (600V maximum, Cu-Al). Offers more connection flexibility than FT/FB series and up to 2500 Amp rating on standard enclosures.

Technical specifications:

- Steel gauge according to size
- Cu-Al lugs approved on all busbars
- SCREW-ON cover
- Standard Aluminium Bars
- ANSI/ASA61 grey polyester textured powder coating inside out

Diagram

How To Order:

- Specify length (x), ampacity and number of wires (3 or 4) in catalog no. Ex.BG11-600-4 (11 feet - 600 Amps - 4 wire bus gutter)
- Specify number of main and secondary lugs for each busbar

TCS and TCF Series

NEMA 1 - Telephone Cabinets

TCS

TCF

Type 1 traditionally called “telephone cabinets”, TCS and TCF enclosures are not limited to housing telephone equipment. They are often used in hospitals, schools and hotels to centralize switches and dimmers for instance, the plywood mounting panel eliminating electrical noise these devices tend to generate. They can also be used to hide a bulky piece of control equipment or simply as top of the line junction boxes, when esthetics come into play.

Technical specifications:

- 16 or 14 gauge steel, depending on enclosure size
- 14 gauge steel door(s)
- Single door on 24” wide and under enclosures models; double doors on greater than 24” wide models
- 3/4” lip all around on flush cover
- 1/4 turn lock provided with two (2) keys
- ANSI/ASA61 grey polyester textured powder coating inside out

How to order:

- Specify TCS for surface mounting
- Specify TCF for flush mounting
- Specify KO for Knockouts (1/2” - 3/4”)
- Specify WB for wood back (TCFKO24246WB = 24”x24”x6” Flush mounting cabinet complete with knockouts & wood back)

VE Series

NEMA 1 - Ventilated Enclosures

Type 1 enclosures, used as general purpose whenever the contents requires ventilation.

- Technical specifications:**
- Box and cover are made from 16 GA steel
 - Two knockouts on the smaller sides
 - Larger sides are fully vented
 - Ventilated cover, fixed by four screws
 - Four embossed mounting holes
 - Grounding hole
 - ANSI/ASA61 grey polyester textured powder coating inside out

Industrial

In the industrial sector, our enclosures provide maximum protection against the elements, contaminants, and harsh conditions.

Their design, focused on accessibility, makes identification and servicing easier. This helps your teams speed up diagnostics and reduce downtime, while ensuring compliance with the strictest standards.

Essentials for your installations

- Single-door enclosures
- Double-door enclosures
- Free-standing cabinets
- Consoles
- Push-button enclosures
- Sealed wireways
- Pedestals and bases

Application examples

- Indoor control stations (Type 1): protection of pneumatic, hydraulic, or electrical control instruments.
- Demanding indoor/outdoor environments (Type 4/4X/12, IP-65): general-purpose enclosures designed to protect instruments in the field.
- High-corrosion areas (stainless steel): indoor or outdoor use where corrosion resistance is critical for instrument protection.
- Applications requiring tight sealing and secure access: gasketed covers, $\frac{1}{4}$ latches.

K Series

NEMA 1 - Single Door Enclosures

Type 1 general purpose enclosure designed to house electrical, pneumatic or hydraulic instruments.

Technical specifications:

- 16 or 14 gauge steel
- Slip hinges enabling door removal for easier access and mounting
- 1/4 turn latch
- 14 or 12 gauge galvanized steel panel on collar studs natural finish (unpainted)
- Grounding stud on inner cover surface
- Grounding hole on mounting panel with grounding screw
- ANSI/ASA61 grey polyester

L Series

NEMA 1 - Single Door Enclosures

Type 1 general purpose enclosure designed to house electrical, pneumatic or hydraulic instruments.

Technical specifications:

- 16 gauge steel frame and door
- 16 or 14 gauge steel detachable mounting back
- Slip hinges enabling door removal for easier access and mounting
- 1/4 turn latch
- Grounding stud on inner door side
- Grounding screw on detachable back
- ANSI/ASA61 grey polyester textured powder coating inside out

NEMA 4-4X-12 - Hinged Lift-Off Cover Enclosures

Type 4-4x-12 enclosure designed for indoor/outdoor housing of electrical, pneumatic or hydraulic instruments.

Technical specifications:

- 16 gauge steel
- Slip hinges enabling cover removal for easier access and mounting
- Seamless poured in place gasketed cover except, captive screw models with neoprene gasket
- Continuously welded and ground smooth seams
- 14 gauge galvanized steel panel natural finish (unpainted)
- 1/4 turn latch
- Grounding screw on mounting panel
- Grounding stud welded on inner cover surface
- ANSI/ASA61 grey polyester textured powder coating inside out

NEMA 4-4X-12 - Single Door Stainless Steel Enclosures

Type 4-4x-12 stainless enclosure designed for indoor/outdoor housing of electrical, pneumatic or hydraulic instruments where corrosion is a determining factor and where severe watering conditions prevail (dairies & breweries).

Technical specifications:

- 16 or 14 gauge 304-4 stainless steel
- Removable cover with seamless poured in place gasket
- Continuously welded and ground smooth seams
- Adlock hasp supplied
- Interchangeable left/right side cover opening
- Cover stabilizing bumpers
- Hinges and 1/4 turn latches made of stainless steel
- Grounding studs welded on inner cover surface
- Galvanized mounting rail
- Galvanized steel mounting panel (unpainted)
- Four (4) stainless wall mounting brackets offering multiple installation positioning
- Self-adhesive polymer BEL data pocket

HD/HDM Series

NEMA 12 - Double Door Enclosures

Type 12 enclosure designed to house and protect pneumatic, hydraulic or electrical equipment.

Technical specifications:

- 14 or 12 steel gauge
- Slip hinges enabling door removal for easier access and mounting
- Seamless poured in place gasketed doors
- Continuously welded and ground smooth seams
- Three point lock flush handle
- Grounding stud on inner door surface and hole on back panel
- 2 or 4 lifting eye bolts
- 12 gauge galvanized back panel (HD7272 will be steel painted smooth white)
- Galvanized mounting rail
- Self-adhesive polymer BEL data pocket
- 12" high mounting feet on HDM model
- ANSI/ASA61 grey polyester textured powder coating inside out

NEMA 4 - Double Door Enclosures

Type 4 enclosure designed to house and protect pneumatic, hydraulic or electrical equipment.

Technical specifications:

- 14 or 12 gauge satin coat steel
- Stainless steel slip hinges enabling door removal for easier access and mounting
- Seamless poured in place gasketed doors
- Continuously welded and ground smooth seams
- Three point lock flush handle on each door
- Grounding stud on inner door surface and hole on back panel
- 2 or 4 lifting eye bolts
- With removable center post
- 12 gauge galvanized panel (HD7272 will be steel painted smooth white)
- Galvanized mounting rail
- Self-adhesive polymer BEL data pocket
- 12" high mounting feet on HDM..F model
- Grounding holes and symbols
- ANSI/ASA61 grey polyester textured powder coating inside out

NEMA 12 - Single Door Freestanding Enclosures, Single Access

Type 12 enclosure designed for indoor protection of electrical and electronic controls, instruments and components.

Technical specifications:

- 12 gauge steel
- Seamless poured in place gasketed door
- Continuously welded and ground smooth seams
- 2 or 4 lifting eye bolts
- Slip hinges enabling door removal for easier access and mounting
- Three point lock flush handle
- Galvanized mounting rail
- Grounding studs welded on inner cover surface and inside enclosure
- Horizontally welded channels on both sides for panel adjustment
- Possibility of half lenght (AFH model), full lenght (AFF model) or side mounting panel galvanized
- Self-adhesive polymer BEL data pocket
- ANSI/ASA61 grey polyester textured powder coating inside out

PE Series

NEMA 12 - Floor Pedestal and Base

Type 12 pedestal used to mount consolets and different types of enclosures. Wiring is pulled trough column and base.

- Technical specifications:**
- 14 gauge steel
 - Welded and ground smooth seams
 - 12 gauge steel flanges welded to column
 - Each column supplied with a box connector fitting, two (2) gasketed flanges and screws
 - Gasketed access plate
 - Built to EEMAC/NEMA 12 requirements
 - ANSI/ASA61 grey polyester textured powder coating
 - BASE - PEB (ordered seperately)
 - 12 gauge steel
 - Column mounting holes with levelling screws

Original Equipment Manufacturers (OEMs)

Customized products are part of our DNA.
We manufacture to your specifications.

Thanks to our engineering expertise, digital tools, and welding robots, we can produce customized product solutions to meet a range of customer specifications, particularly those of original equipment manufacturers (OEMs).

Examples of customization

- Paint color
- Materials
- Dimensions and configurations
- Shapes and cutouts
- Size and position of holes/openings
- Added shelves or partitions
- Special handles and locking systems
- Ventilation devices
- Inner panels
- Added windows
- And much more!

Designed and Built To Our Customer's Specifications

Custom Enclosures

Model COA & JR

The computer angle station offers a full-featured, ready-to-use solution to protect computer systems in an industrial environment.

The enclosure could include an upper front window door, lower front solid door, shelves for computer and printer, and a keyboard compartment.

The oil and dust tight JR enclosure is designed to house a computer right on site, where the action is...

The enclosure could include a special frame to accommodate a 19" or 24" rack equipment.

Accessories

A complete range of accessories for faster and safer integration. The right accessory selection saves installation time, improves access and wiring, and enhances system reliability.

Essentials for your installations

- Distribution blocks and grounding kits
- Mounting accessories
- Window kits
- Locks and handles
- Replacement inner panels
- Ventilation kits and air filters

Accessories

Spare Inner Panels For MC, K

AKP Series

Spare inner panels for all K enclosures

Technical specifications:

- Made from 14 and 12 gauge galvanized steel depending on sizes
- Galvanized natural finish (unpainted)

Accessories

Special Handles

Quarter turn standard cut out, for A11KK, A16Ks, A12KTC, A15KR and A15KRK

Cat. no. A11KK

Flush Lock Kits 1/4 Turn Latch

- Used on K Series
- High quality black zinc plated
- Supply with latch and clip for easy field installation
- Rated NEMA 1

Cat. no. A16KS/A16KS-SS

Flush Lock Kits 1/4 Turn Latch

- Used on S Series
- High quality black zinc plated for A16KS and stainless steel for A16KS-SS
- Supplied with latch gasket, nut and O-ring gasket for field installation
- Rated NEMA 12-4

Cat. no. A16KSK

Flush Key Lock Kit

- Used for S Series
- High quality black zinc plated
- Supply with latch gasket, nut and O-ring gasket for field installation
- Rated NEMA 12-3R

Cat. no. A12KTC

Flush Key Lock Kit 1/4 Turn Latch

- Used on TCS, TCF, EUKO and K Series
- High quality black zinc plated
- Supplied with latch and clip for easy field installation
- General purpose application only
- Rated NEMA 1

Accessories

Special Handles

Quarter turn standard cut out, for A11KK, A16Ks, A12KTC, A15KR and A15KRK

Cat. no. A14K

Toggle Pull Latch

- Made from steel, zinc plated
- Provides a provision from padlock
- To be mounted externally, suitable for oil-tight enclosures
- Rated NEMA 12-4

Cat. no. A15KR/A15KR-SS

Flush Lock Kit 1/4 Turn Latch

- Used on R Series
- High quality black zinc plated for A15KR and stainless steel for A15KR-SS
- Supplied with latch gasket, nut and O-ring gasket for field installation
- Rated NEMA 12-4

Cat. no. A15KRK

Flush Key Lock Kit

- Used on R Series
- High quality black zinc plated
- Rated NEMA 12-3R

Accessories

Three-Point Lock - Automotive Type Handles

Cat. no. A8K

Padlocking Vault Handle Kit

- 6" long cadmium plated handle
- 3.25" long shaft
- Shipped complete with latch, nuts and bolts for field installation
- May be used for oil-tight or weather-proof applications; not suitable for water-tight applications
- Can be factory installed; specify suffix "F" (Ex. A8F)
- Rated NEMA 12-3R

Cat. no A10K

Automotive Locking Handle Kit

- 3.75" long chrome plated handle and flange
- 3" long latch shaft
- One single type of key
- May be used for oil-tight or weather-proof applications; not suitable for water-tight applications
- Supplied with latch and screws for field installation
- Can be factory installed; specify suffix "F" instead of "K" (Ex. A10F)
- Rated NEMA 12-3R

Cat. no A10K3 – A8K3

Automotive Three Point Lock Kit

- Same type handle and A10K - A8K, plus top and bottom nylon rollers latch bars
- Shipped complete with all necessary hardware for field installation
- Enclosure catalog no. must be specified when ordering A10K3 or A8K3 handle
- May be used for oil-tight or weather-proof applications not suitable for water-tight applications
- Can be factory installed; specify "F" instead of "K" (Ex. A10F3 or A8F3)
- Rated NEMA 12-3R

Cat. no AMK – AMK3

Enclosure flush handle

- Single or 3 points lock
- Designed for type 4-12 enclosures
- Complete with key and padlock rings.
- Two keys provided
- Finish textured black
- Rated NEMA 4-12

Accessories

Three-Point Lock - Automotive Type Handles

Cat. no. AHD108K

Heavy duty latch

- Single point lock
- Rated NEMA 4-12
- Padlocking handle

Cat. no. AHD108K3

Heavy duty latch

- Three points lock
- Rated NEMA 4-12
- Padlocking handle

Cat. no. AHD110K

Heavy duty latch

- Single point lock
- Two keys provided
- Rated NEMA 4-12
- Keyed handle
- C/W padlocking hasp

Cat. no. AHD110K3

Heavy duty latch

- Three points lock
- Two keys provided
- Rated NEMA 4-12
- Keyed handle
- C/W padlocking hasp

Accessories

Mounting Hardware

Cat. no. AMFRS / AMFRSS

External Mounting Feet

- Made from galvanized steel, for AMFRS
- Made from stainless #304 for AMFRSS
- To be mounted externally; suitable for water- / oil-tight enclosures
- Standard with every “R” enclosure
- Supplied with all necessary hardware for field installation

Cat. no. APRS / APRSS

Provision for Padlocks

- Made from galvanized steel for APRS
- Made from stainless steel #304 for APRSS
- Provides a provision for padlocks
- Standard with every “R” and “AMC” enclosure
- To be mounted externally; suitable for water- / oil-tight enclosures
- Supplied with all necessary hardware for field installation

Cat. no. AGPSRK

Padlock adapter

- Padlock adapter fits directly over the slotted quarter turn preventing access.
- 2mm thick 14 gauge stainless steel.
- Stainless steel mounting hardware provided.
- Once installed, the bolts cannot be removed without the door open.
- Easy installed in the field.
- Maintains UL/CSA Type 4 rating

Cat. no. AMR

Galvanized mounting rails unpainted

- Galvanized mounting rails unpainted, for R, HD and FRS series
- Perforated and slotted, for easy wiring installation.
- AMR-R, AMR-HD or AMR-FRS enclosures, add H for horizontal or V for vertical mounting rail. (AMR-RH or AMR -RV)
- Call factory for sizes and prices.

Accessories

Mounting Hardware

Cat. no. ALEK

Lifting Eyes Kits (Pair)

- 1/2 - 13 lifting eyes used on BEL large enclosures
- Sold by pair complete with flat seal washers and nuts
- Lifting capacity approximately 2500 lb each
- Can be factory installed (specify “F” instead of “K”; Ex. ALEF)

Cat. no. AHR / AHR-SS

Hinges for R Series

- Used for R Series
- Made of steel, zinc plated for AHR
- Made from stainless steel #304 for AHR-SS

Cat. no. APG / APW

Spray Paint

- Gray paint “APG” (spray can)
- White paint “APW” (spray can)

Cat. no. ASIL

Silicone

- Silicone provided for EEMAC requirement
- Standard with ADSR-ADSHD

Accessories

ASPK Series - Swing Out Panel Kits For R Enclosures

Caractéristiques :

- Used to allow installation of components near the front of the enclosure.
- All kits are supplied with the necessary hardware and instructions.
- Outside screws are stainless steel.
- Designed to be used in the R.RAL and RSS single door enclosure series.
- White polyester coated over phosphatized surfaces.
- Can be factory installed (specify "F" instead of "K"; Ex. ASPF1620).

Accessories

Drip Shield Kits

Technical specifications:

- Designed for use on our standard R and HD enclosure series (EEMAC/NEMA 12-3R)
- Each kit includes drip shield, silicone stainless steel 10/32 screws and plated nuts
- ANSI/ASA61 grey polyester textured powder coating applied over phosphatized surfaces
- Can be factory installed (specify “F” after catalog number; Ex. ADSRF12, ADSHDF42)

Single door, “R” Series

Cat. No.	Width box
ADSR12	12
ADSR16	16
ADSR20	20

Accessories

Ventilating plates, air filter kits

Technical specifications:

- Made from 14 gauge steel
- Supplied with all necessary nuts and bolts
- Designed to provide ventilation to panel mounted instruments and controls
- Special sizes available on request
- Air filter can be supplied in form of a kit, consisting of a perforated steel frame, and a fiber filtering media. Factory installed on request only (specify “F” instead of “K”; Ex. AFLF4)
- ANSI / ASA61 grey polyester textured coating over a phosphatized base.

How to order

- Ventilating plates and air filter assembly must be ordered separately.

Cat. No.	A x B	No. of louvers	Lnht. of louvers	Opening area (in²)	Cat. No. Air filter kit

Grounding Kits

- Technical specifications:
- Grounding kits are supplied with all necessary mounting hardware
 - All connectors are CU-AL approved
 - Can be factory installed (specify “F” after cat. No.; Ex. TGR200F)

General Information

Powder Textured Polyester Coating

To produce a tougher and more resistant finish, BEL Products Inc. enclosures, including lay-in wireways, “D” and “E” boxes and splitter boxes are coated with a powder textured polyester.

BEL electrical enclosures provide better resistance to:

- Chipping
- Chalking and colour change
- Chemicals and stains

BEL powder textures polyester coating accelerated laboratory tests showed:

- No Blistering (in 1000 hours of humidity)
- No face rust (in 1000 hours of 5% salt spray)
- No peeling (in 500 hours of 49°C water immersion)

General Information

For The Application of Stainless Steel (Austenite)

A.I.S.I. Grade	Features	When and Where to Use it
Shade 304	The amount of carbon limited to a maximum of 0.08	Applications similar to Shade 302 with a higher resistance to corrosion on surfaces affected by welding
Shade 316	Exceptional resistance to corrosion; improved resistance to distortion	For extreme conditions of corrosion

Finishes

Number 2B	Cold-lamineated, bright. Laminated finish for all uses. Finish varies according to type and thickness of stainless steel. Thin sheets usually brighter than thick ones.
Number 4	A polished finish for all uses. Utilization applies to restaurants and dairy accessories, food product treatment or transformation, medical and chemical equipment, as well as to a variety of architectural products.

General Information

NEMA, UL and CSA Designations

Enclosure Rating	National Electrical Manufacturers Association (NEMA Standard 250) and Electrical and Electronic Mfg. Association of Canada (EEMAC)	Underwriters Laboratories Inc. (UL50 and UL 508)	Canadian Standard Association Standard C22.2 (No94)
			
TYPE 1	Enclosures are intended for indoor use primarily to provide a degree of protection against contact with the enclosed equipment or locations where unusual service conditions do not exist.	Indoor use primarily to provide protection against contact with the enclosed equipment and against a limited amount of falling dirt.	General purpose enclosure. Protects against accidental contact with live parts.
TYPE 2	Enclosures are intended for indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt.	Indoor use to provide a degree of protection against limited amounts of falling water and dirt.	Indoor use to provide a degree of protection against dripping and light splashing of non-corrosive liquids and falling dirt.
TYPE 3	Enclosures are intended for outdoor use primarily to provide a degree of protection against windblown dust, rain and sleet; undamaged by the formation of ice on the enclosure.	Outdoor use to provide a degree of protection against windblown dust and windblown rain; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain, snow and windblown dust; undamaged by the external formation of ice on the enclosure.
TYPE 3R	Enclosures are intended for outdoor use primarily to provide a degree of protection against falling rain and sleet, undamaged by the formation of ice on the enclosure.	Outdoor use to provide a degree of protection against falling rain undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain and snow undamaged by the external formation of ice on the enclosure.
TYPE 4	Enclosures are intended for indoor or outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water and hose-directed water, undamaged by the formation of ice on the enclosure.	Either indoor or outdoor use to provide a degree of protection against falling rain, splashing water and hose-directed water; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against rain and snow, windblown, dust, splashing and hose-directed water undamaged by the external formation of ice on the enclosure.
TYPE 4X	Enclosures are intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water and hose-directed water; undamaged by the formation of ice on the enclosure.	Either indoor or outdoor use to provide a degree of protection against falling rain, splashing water and hose-directed water; undamaged by the formation of ice on the enclosure; resists corrosion.	Indoor or outdoor use; provides a degree of protection against rain and snow, windblown, dust, splashing and hose-directed water undamaged by the external formation of ice on the enclosure; resists corrosion.
TYPE 6	Enclosures are intended for use indoors or outdoors where occasional submersion is encountered.	Indoor or outdoor use to provide a degree of protection against entry of water during temporary submersion at a limited depth; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use; provides a degree of protection against the entry of water during temporary submersion at a limited depth; undamaged by the external formation of ice on the enclosure; resist corrosion.
TYPE 12	Enclosures are intended for indoor use primarily to provide a degree of protection against dust, falling dirt and dripping non-corrosive liquids.	Indoor use to provide a degree of protection against dust dirt, fiber flyings, dripping water and external condensation of non-corrosive liquids.	Indoor use; provides a degree of protection against circulating dust, lint, fibers and flyings; dripping and light splashing of non-corrosive liquids; not provided with knockouts.
TYPE 13	Enclosures are intended for indoor use primarily to provide a degree of protection against dust, spraying of water, oil and non-corrosive coolant.	Indoor use to provide a degree of protection against lint, dust seepage, external condensation and spraying of water, oil and non-corrosive liquids.	Indoor use; provide a degree of protection against circulating dust, lint, fibers and flyings; seepage and spraying of noncorrosive liquids, including oils and coolants.
