### Cast iron for slab-on-grade applications

664 Series

### Features and benefits:

Multiple-service floor boxes deliver power, communications and data from standard conduit with no exposed service fittings. Result: Open office planning flexibility. Ideal for the modern office with workstations that have power, communications and data equipment. Power receptacles and low-voltage connections can be enclosed underfloor in either steel or cast-iron bodies. Galvanized 14-gauge steel boxes are provided with knockouts from ¾" to 1¼" (see engineering data). Cast-iron bodies have threaded openings for ¾" and 1" conduit.

- Two-compartment box is available in three configurations: stamped steel (664-SC), shallow (664-S) (see page C52) and cast iron (664-CI)
- Durable nonmetallic covers include a steel reinforcement plate for added strength
- Metallic covers in solid brass, aluminum and aluminum black powder-coated provide aesthetics and durability
- Cover flange self-levels with the finished floor for easy installation

Cat. No.	Description	Std. Ctn.
664-CI	Cast-iron box which accepts two plates, with one duplex 664-RP provided	1
Note: When ordering a 664 Series box, the co	over must be ordered separately. See page C14	

Note: When ordering a 664 Series box, the cover must be ordered separately. See pag For communications accessories, see page C113.

664-CST-M-BLK	Solid aluminum cover, black powder coated for 664 Series floor boxes	2,250	1

# Wire tunnel

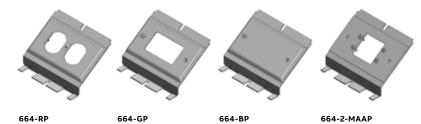

664 Series

• Wire tunnel for protecting electrical connections between the two receptacles when the box is used for power/power application

Description	Std. Ctn.
For use with 664 and 664-CI floor boxes	4
•	

## Device plates

664-SC & 664-CI

- Receptacle face plate for 664 Series floor box for additional power service
- Does not include receptacle. Can be placed at either end of floor box

Cat. No.	Description	Std. Ctn.	
664-RP	For use with 664 and 664-CI floor boxes	4	
664-BP	Blank plate for use with 664 & 664-CI floor boxes	4	
664-GP	GFCI receptacle plate	4	
664-2-MAAP	Device panel, accepts 2 Extron® MAAP plates	4	

CAUTION: When using the center side KOs, all 664 plates must be assembled to the box prior to installing the conduit.

## Cast iron for slab-on-grade applications

665 Series - 665-Cl

The Steel City 665 cast iron floor box provides a high-capacity power and data solution for ground-floor installations. This 4-gang recessed service floor box is ideal for slab-on-grade applications. Removable voltage dividers enable users to customize wiring configurations by feeding two or more adjacent compartments with a single conduit. Aesthetic covers feature a recess to accept floor covering to match the surrounding floor.

### Features and benefits:

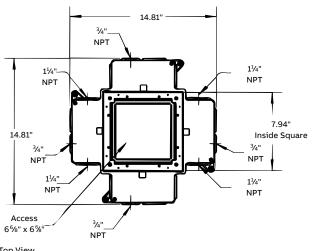

- 4-gang, recessed service for a high-capacity aesthetic floor-box solution
- Removable voltage dividers between compartments enable a single conduit to feed two or more adjacent compartments heavy duty, nonmetallic covers with steel reinforcement plates are available in a wide variety of colors to match any decor (black, grey, brown and beige)
- Metallic covers
- Separate cord door in the cover latches firmly in the open position to prevent damage to cables
- MopTite covers meet UL/CSA scrubwater exclusion requirements for carpet, tile and
- wood
- Largest cubic-inch capacity of any cast iron recessed 4-gang floor box
- Inline 1¼" hubs allow high-capacity straight runs for communicator wiring
- Custom device panels and hub sizes are available. Contact technical service about these offerings
